EDUCATION

Viswajyothi College of Engineering and Technology, Vazhakulam <i>B.Tech (Honours) in Computer Science and Engineering, APJAKTU — CGPA: 8.64</i>	2019–2023
Viswadeepthi CMI Public School, Adimali <i>XII, CBSE — 82%</i>	2017–2019
Viswadeepthi CMI Public School, Adimali <i>X, CBSE — CGPA: 9.4</i>	2016–2017

WORK EXPERIENCE

Senior Engineer – Envestnet <i>Java Developer</i> - Contributed to a B2B wealth management platform, working across both a legacy Java Servlet application and a modernized Spring Boot service as part of an ongoing architectural migration. - Enhanced and maintained core backend modules in the legacy system, ensuring stability and continuity for existing enterprise clients. - Participated in developing new features on the Spring Boot application, supporting the platform's gradual transition toward a more maintainable and scalable architecture.	2025 - Present
Engineer – QBurst <i>Java Developer</i> - Developed two Spring Boot applications, delivering robust backend services aligned to project objectives. - Automated deployments by dockerizing the apps and implementing GitLab CI/CD, hosting in both AWS EC2 and GCP environments. - Collaborated actively in daily Agile scrums and team planning via ClickUp, regularly performing code reviews.	2023 - 2025

PROJECTS

B2B Wealth Management Platform - Facilitated the architectural modernization of an enterprise wealth management system, migrating core functionality from a legacy Java Servlet environment to a scalable Spring Boot architecture. - Engineered secure RESTful APIs to process complex investment data and portfolio metrics, ensuring seamless continuity for existing institutional clients. - Optimized backend modules and resolved legacy technical debt, significantly improving system maintainability and deployment reliability.
Ticketing System - Developed backend APIs with Spring Boot and Hibernate using PostgreSQL for reliable and performant data management. - Containerized backend services with Docker and orchestrated deployment via AWS EC2, emphasizing scalability and operational efficiency. - Implemented unit tests using JUnit to validate business logic and reduce regression risks.
Marketplace App - Built a monolithic application with Spring Boot and PostgreSQL to implement essential marketplace functionalities, including user management and product listing workflows. - Established automated deployment by incorporating Docker and GitLab CI/CD, deploying the application to GCP for streamlined release processes.

TECHNICAL SKILLS

Languages & Frameworks : Java, Spring Boot, JavaScript, Python, React.js, Node.js, HTML, CSS
Cloud & DevOps: AWS EC2, Docker, GitLab CI/CD, GitHub Actions
Databases & Tools: PostgreSQL, MySQL, Hibernate, Git, ClickUp, Nginx, Selenium, Maven, JUnit

CERTIFICATIONS

Java Spring Framework 6, Spring Boot 3 - Telusko Udemy Developed Spring Boot REST APIs using a layered architecture and Microservices based design for scalability and maintainability.
The Complete SQL Bootcamp Udemy Mastered SQL query construction, table design, and analysis using PostgreSQL.
Docker and Kubernetes - The Complete Developers Guide Udemy Containerized sample applications with Docker; learned architectural principles for cloud deployments.
GitLab CI/CD: Pipelines, CI/CD and DevOps Udemy - Gained practical experience in setting up CI/CD pipelines using GitLab. - Learned to automate builds, tests, and deployments with GitLab CI/CD, including deploying applications to AWS, GCP, and Azure.
